#### When to use TANOPLUS AR FRESH

#### ROSE WINES® ?

Wines that are considered to be outside the acceptable range eg : all wines lacking of structure should be lab-treated with TANOPLUS AR FRESH ROSE WINES®.

The treated wines can be tasted the same day of the treatment, however it is recommended to wait at least 48 hours.

Furthermore, revalue wines of average range at a lower cost.

It is recommended to use TANOPLUS AR FRESH ROSE WINES® at a dosage between **7 to 15 g/hl** after dilution in wine. The dosage, and therefore the treatment cost, can be optimised by doing direct trials in bottles at different concentrations.
