FORMULATION OF PURE PROANTHOCYANIDIC AND ELLAGIC TANNINS.

**FLAVTAN VR® IS AN ASSOCIATION OF TANNINS
MAKING TO FACILITATE THE CLARIFICATION AND
TO IMPROVE THE FINING.**

100% NATURAL, WITHOUT PRESERVATIVES. WITHOUT GMO.

Application

By its mode of complexes action, FLAVTAN VR® stabilizes the colour and helps to protect against oxidation on grapes infected by Botrytis Cinerea.

Description and Uses

FLAVTAN VR® is a product developed by Partoeno R&D and tested by the University of Bordeaux, France and key wine consultants on different wines, regions and vintages.

With these traditional properties of the ellagic tannins is added the proanthocyanidic characteristics of the tannin : improvement of the stabilization of the color in particular in the presence of grape harvest not very ripe. In the case of botrytised grape harvest, FLAVTAN VR® contributes to the inhibition of laccase.

FLAVTAN VR® IS USED FOR WINES PRESENTING DIFFICULTIES OF CLARIFICATION AND TO OBTAIN RAPID RESULTS ON STRUCTURE.

When to use FLAVTAN VR®?

Wines that are considered to be outside the acceptable range eg : all wines presenting difficulties of clarification. The treated wines can be tasted the same day of the treatment, however it is recommended to wait at least 48 hours.

Furthermore, revalue wines of average range at a lower cost.

The FLAVTAN VR® is especially effective to protect the grapes infected by Botrytis Cinerea.

It is recommended to use FLAVTAN VR® at a dosage between **5 to 30 g/hl** of red and rosé wine after dilution in wine. The dosage, and therefore the treatment cost, can be optimised by doing direct trials in bottles different concentrations.
